

```

1  /*
2  settextjustify: Sets text justification for graphics mode
3
4  settextjustify(int horiz, int vert);
5
6  Remarks:
7  Text output after a call to settextjustify is justified around the current
8  position (CP) horizontally and vertically, as specified.
9
10 Horizontal and vertical justification for settextjustify
11
12 Argument  Constant      Value      Meaning
13 -----
14  horiz    LEFT_TEXT      0      Left-justify text
15           CENTER_TEXT     1      Center text
16           RIGHT_TEXT      2      Right-justify text
17  vert     BOTTOM_TEXT     0      Justify from bottom
18           CENTER_TEXT     1      Center text
19           TOP_TEXT        2      Justify from top
